## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4, 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by "some commonality with a communication path" is referring to.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-36 are rejected under 35 U.S.C. 102(e) as being anticipated by Nagata et al U.S. Patent Number 6,181,680.

Re Claims 1, 14, 23, 29, fig. 1 teaches a Maintenance Console 2 (an originating endpoint) for sending a message too ATM switch (a first terminating endpoint) wherein the OAM cell control section 40 determines an ATM line control unit 61 corresponding to a specific leaf point destination designated by the administrator, and requests the same

Art Unit: 2616

control unit 61 to pass the OAM cell sent from the root-side ATM line control unit 61, wherein the OAM cell sent from the root-side ATM line control unit 61 arrives at the plurality of leaf points in the ATM switch, but is transmitted out only through the ATM line control unit corresponding to that specific leaf point (See col. 7, lines 20-50), wherein the transmitting ATM line control unit 61 enables detection of the CC cells and ATM line control unit not specified suppressing generation of the CC cells.

Re Claims 2, 9, 10, 15, 20, 24, 26, 27, 30, 34, 35, refer to Claim 1, wherein the ATM line control unit not corresponding to specified leaf point are suppressed from generating the CC cells in response to the OAM message.

Re Claims 3, 11, refer to Claim 2, for setting message.

Re Claims 4, 12, refer to Claim 1, wherein the maintenance console provisions a new set up (add-party) messages (some commonality over a communication path) over the same ATM switch.

Re Claim 5, refer to Claim 1.

Re Claims 6, 13, 16, 17, 21, 22, 31, 32, 36, refer to Claim 1, wherein the ATM switch is point to multipoint.

Re Claim 7, refer to Claim 6.

Re Claims 8, 18, 19, 25, 28, 33, refer to Claim 1, wherein the CC cells loopback test and determined by absence of the CC cells and notified to the maintenance console (a network manager).
